

# LIFE SCIENCE - Chapter 1 Vocabulary:

- Science
- Life Science
- FIVE SKILLS Scientists use to learn about our world
  - Observation
  - Inference
  - Classification
  - Prediction
  - Making Models
- Quantitative Observation
- Qualitative Observation
- 6 Steps of the Scientific Method (SIX GREAT FARMERS PLANT ALL DAY)
  - 5 Senses used for Observation
    - Variable
    - Controlled Experiment
  - Manipulated (Independent) Variable
  - Responding (Dependent) Variable
    - Hypothesis
  - Science vs. Technology
- Science strives to answer what question
- technology strives to answer what question
